Subject: Please Recommend Yucca Mountain For Radioactive Repository!

Part of Records Package / Supplement / Correction

Ms. Carol Hanlon
S&ER Products Manager
U. S. Department of Energy
Yucca Mountain Site Characterization Office
P.O. Box 30307 M/S 025
North Las Vegas, NV 89036-0707

Dear Ms. Hanlon:

I wanted to let you know that I feel very strongly that the DOE recommend to Mr. Bush that the Yucca Mountain site be designated as the repository for radioactive materials.

I feel very strongly that be done for many reasons including:

- 1) Storing these dangerous waste materials at one location makes much more sense compared to accumulating the waste in numerous locations all across the USA.
- 2) The Yucca Mountain site has been identified by experts as the best national disposal facility location
- 3) Storage containers for spent fuel have a time-proven track record of safety within the nuclear industry.
- 4) The scientific community agrees that geologic disposal represents the best solution for radioactive waste disposal and that Yucca Mountain would be a most suitable location for such disposal.

I hope that you'll urge Mr. Bush to utilize the Yucca Mountain site as our national disposal site.

Thanks For Listening,

Steven C. Gilbert
